

General Instructions

Main Menu

- Turn on the lights in the photo area.
- Position the lights so that they adequately illuminate to photo area.
- Go to the Volunteer page on the FS website
 - Log in
 - Select the Inventory Entry application
- This icon opens to the Main Menu of the Inventory Entry System, and you will see the following screen, which allows you to create new items, edit existing items, and set the color balance.

Inventory Management

[New Item](#)

[Main Menu](#)

[New Item](#)

[Edit Item via ID](#)

[Edit Item via Dot](#)

[Set Color Balance](#)

- The "New Item" link allows you to create a new item
- The "Edit Item via ID" allows you to edit an existing item by the inventory ID
- The "Edit Item via Dot" allows to edit an existing item via its "dot" code (ex A123)
- The "Set Color Balance" allows you to adjust the color balance of the light that you're photographing in. Suggested values are provided.

Creating/Editing an Item

- If you press the "New Item" link, you will be presented with a blank item form
- If you press the "Edit Item via ID/DOT", you will be presented with a form to enter the inventory ID or the Dot code. If the system can find the item, the form will be filled in with the existing data.

- The steps to inventory most furniture and housewares are the same. In the following example, we will use appliances as an example of how to enter a new item into the inventory system.

Inventory Management

Create Item

Item Class:

Item Type: [Create Item](#)

Qty Available: ☐ Always Available

in set:

Dimensions: x x

Description:

Master item of set:

Part of Set:

Dot: [Generate Dot](#)

- All items are grouped by class. Examples of classes are Kitchen, Lamps, and Tables
- Within each class, there are different types of items. The drop-down list will change based on the class.
 - For example, "Small Appliance", "Small Appliance - Free", and other types are options in the Kitchen class.
 - Select Kitchen in the Item Class drop-down menu
 - Select "Small Appliance" from the Item Type

Inventory Management

Edit Item

Item Class:

Item Type: [Create Item](#)

Qty Available: ☐ Always Available

in set:

Dimensions: x x

Description:

Master item of set:

Part of Set:

Dot: [Generate Dot](#)

- Enter Details:
 - **Qty Available** – default is 1. If we have received 10 coffee makers of the same type, change this to 10 and print 10 labels.
 - **# in set** – default is 1. For example, if a dish set contains 4 place settings, change this to 4. If there are 2 matching end-tables, change this to 2.
 - **Dimensions** – width x depth x height in inches

- **Description**
 - Add a note, if necessary, to describe the item
 - If an item is heavy, be sure to make a note of that.
 - If there are flaws, include a description of the issue.
- **Master item of set**
 - If there are multiple items in a set (ex: a dresser with a matching end table), select Yes to mark the dresser as the master item.
- **Part of Set**
 - If this item is part of a set of items (ex: a matching end table to a dresser which is marked as the master part), select the master item from the list
- **Dot**
 - If an item has multiple parts (ex: a headboard with a footboard, rails, slats, etc), press the **Generate Dot** button to create a dot code. The dot code will print on the label (ex: A123), and you should manually write the dot code onto the colored labels and stick them onto the parts. Also, stick the same color dot onto the label so the movers will know to look for a red A123 dot.
- Press the **Create Item** button to create a new item or press the **Update** button to save changes to an existing item.
- To print a label:
 - Select the **Printer** icon
 - Wait for the system print dialog box to appear.
 - If you need to print multiple labels, change the quantity in the Copies.
 - Press the yellow print symbol.
 - Scotch tape the label to the item. Don't stick the label directly on the item.
- To take a picture:
 - Select **Take a picture**
 - If the object is wider than it is high, take a horizontal picture. Otherwise, take a vertical picture.
 - Click on the single "tree" icon on the left side of the screen. This will zoom in and allow you to take photos that aren't distorted by the wide-angle lens. Step away from the object if necessary.
 - Try to fill as much of the frame as possible.
 - Click the Take Picture button
 - Review the photo. If you're happy, press OK, otherwise, press cancel and retake the photo.
 - Add a second photo if the 1st picture doesn't adequately show the item's print or color, take a closeup for a 2nd shot.
 - Add additional photos to document any major flaws.

- If you need to re-take the 1st photo, DO NOT delete the 1st photo until you have taken a 2nd photo. You may then delete the 1st photo.

Item Class:

Item Type:

Qty Available: ☐ Always Available

in set:

Dimensions: X X

Description:

Master item of set:

Part of Set:

Dot:

Color Temp:

Press button above to take an image of the item.
Repeat if multiple images needed.

- Move the item to the appropriate storage location.
- If you have more items that need to be inventoried, press the **New Item** button and repeat.

End of Shift Review

- 15 minutes prior to leaving, review images
- Select **Home** from the navigation bar
- Click on the **Latest Items** icon
 - By default, the prior weeks of inventory are shown in numerical descending order, meaning that the latest items are shown first, followed by older items
 - If multiple people are doing inventory entry, the photos will be mixed
 - Swipe left or use the scroll bar to get to older items.

- If you've only worked on one type of item, you can change the Item Type to what you've worked on

Editing Items:

- If you need to edit any of the details for an item, click on the item # under the photo
- This will bring you to the Inventory Entry system.
- Update the information that needs editing.
- Press the **Update Item** button and close the page.
- If NO IMAGE AVAILABLE appears on an item that you entered
 - Click on the item number under the "No Image Available" image
 - This will take you to the Inventory Entry system.
 - Take a photo
